2.3 Virtual Chicanes

This event will use virtual chicanes in a couple of places to slow down the cars for safety reasons. As you approach the virtual chicane the RallySafe unit will count down the distance to the start of the chicane and remind you of the target speed... 30km/h. You must slow down to the target speed anywhere inside the chicane zone, and that might mean starting to slow down before you enter the virtual chicane.
