

Big White 2019

— Car #10

We believe car #2 is using Launch Control  
as of Rule 12.7.6.2: ECU

" ECU is Free. Launch Control and Anti-lag are permitted only  
if these features are available <sup>as</sup> for OEM features." Page 48

02-07 Subarus to our belief and as informed by a Subaru  
Mechanic this did not come as a feature on any OEM of that  
generation - Car builders have watched video and also believe the same  
→ a race tuner

Videos submitted to Organisers suggest the use of  
Launch Control on Blackforest SS 1/2

We would like videos reviewed. If found to be  
using Launch Control we would like car #2 to  
be moved to open class which allows <sup>the use of</sup> Launch Control

---

ON REVIEW OF THE VIDEO BY ORGANISERS AND THE  
CATS TECHNICAL DIRECTOR, WE FEEL THAT IT DOES SHOW  
LAUNCH CONTROL BEING USED IN VIOLATION OF 12.7.6.2

SOURCE OF VIDEO WAS CONFIRMED AS AN  
EVENT VOLUNTEER.

CAR 2 IS REMOVED FROM PAWD BUT WILL BE  
SCORED IN THE OVERALL RESULTS.
